

Building #116 Demolition Project

Demolition . Abatement . Akron, OH

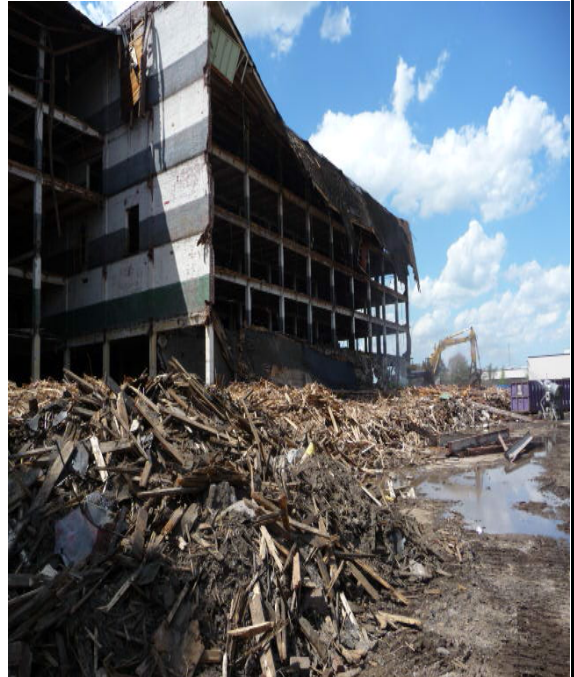

Building #116 – Akron, OH

This project was part of the Clean Ohio Revitalization Fund (CORF) and included the abatement and demolition of the facility.

General Project Scope

Homrich was contracted to perform demolition of the large building formerly used as a Manufacturing Facility. This (6) story 1,050,000 sq. ft. facility was abated, demolished, recycled and restored by Homrich. All scrap was prepared on the project site and delivered to local steel mills. All concrete slab and footings were demolished and crushed for reuse as fill on the project site.

Soil erosion and sedimentation control permits as well as, storm water permits were obtained for this project.

TOTAL DEMOLITION
