

The Former GM Plant

Interior Industrial Demolition - Moraine, OH

The Former GM Plant, Moraine, OH

Moraine Assembly was a General Motors automobile factory in Moraine, Ohio, United States, a suburb of Dayton, Ohio. Opened in 1951, originally as a Frigidaire appliance plant, the plant produces trucks for GM. From 2001-2008, it produced the GMT360 SUVs. The 3rd shift of production was eliminated from Moraine effective in July 2006 following an announcement in November 2005.

General Project Scope

Homrich was contracted to perform the interior demolition of the (2) story, 2,650,000 sq. ft. structure. Homrich utilized 6-8 machines equipped with shears.

- Excavators with shear attachments were employed for removal of the auto assembly lines throughout the plant.
- Burners and man lifts were utilized for removing ceiling mounted assembly line throughout the entire plant
- All scrap was processed on site for transportation to the steel mills
- Homrich was responsible for the utility disconnects and securing a safe work environment. Homrich devised and presented a submittal plan for future manufacturing applications.
