Guardian Building – Detroit, MI

The Guardian Building is an architectural gem nestled in the Financial District it helped establish over 80 years ago in downtown Detroit.

General Project Scope

Homrich was contracted to perform extensive work on the Mechanical systems, including 26 floors of the structure's pipe chases were repaired and cleaned of hazardous materials. Homrich was charged with protecting the building's lavish materials. With precision and great care, existing wall covering, window treatments, light fixtures, millwork, ductwork, electrical conduit and wiring were removed.

SELECTIVE DEMOLITION
